

Industry News

System of Zhuhai ATC

Profession Exploration

42 Application and challenge of dense wavelength division multiplexing (DWDM) in ATC SDH transmission network

Air Traffic Management

5 Overcapacity operation analysis of some busy airports during Spring Festival 2018

Monthly Aviation Weather Review

45 Review of aviation weather in July 2018 and its impact on operation

8 Air traffic control similar callsign recognition and implementation

11 A method of data synchronization between ATC automation systems

Aeronautical Meteorology

47 Estimation of Precipitation Intensity and Its Effect Test Based on Radar Data of Hefei Xinqiao Airport

Communication Navigation and Surveillance

14 Engineering practice of SSR test transponder system in Lanzhou Zhongchuan Airport S mode

50 Application of FlexStack-Plus technology in AWOS network

17 Application and performance analysis of DME/DME selection

52 Observation and application of runway visual range

20 Discuss on Transmitting of ATC Asynchronous Data

55 Comparative analysis of two warm sector rainstorms in Jiangxi Province in May 2017

22 Analysis on second base station planning of 800MHz digital trunking network in Urumqi Airport

59 Forecast analysis of Xian Xianyang Airport early thunderstorm in 2017

26 The "culprit" of soft fault in communication and navigation equipment

General Management

30 Method For Keeping Constant Output Power Of Navigation Transmitter Under Battery Condition

62 The influence of human factors on ATC Safety

34 Analysis and Research on the speed adjustment and modification of the transmission of Yibin INDRA Radar

65 Life cycle management of ATC construction project

37 Performance analysis of SSR based on RBAT

Statistics Bulletin

39 The Network Security Work Analysis of AeroTrac Air Traffic Control

68 Civil Aviation ATC operation and service statistics bulletin in July 2018
